Mike,

I did, but none with the correct numbers. And by correct numbers, I mean they still haven't determined what we are going to do, so I have nothing to use for the ROI.

Since VJIP money was the only incentive, we didn't run any further ROIs. So in essence you could say, we'll be positive year one when they begin operating because we'll earn some income off of the personal income tax of whatever employees are full time.

The Boy Scouts provided an economic impact statement, but Ann looked it over and said it wasn't worth the paper to print it because their assumptions were so erroneous as to render it meaningless.

Jay,

By some odd chance did we run an ROI for Jamboree based on the few jobs and capital investment they'll be making? I didn't see anything in the ROI folders. rying to grasp for straws and see about playing up some of the positive impacts of this project.

Thanks,
